## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CAR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 2, 9, and 10, drawn to polypeptide.

Group II, claim(s) 3-7, drawn to cDNA.

Group III, claim(s) 8, drawn to method for producing the polypeptide.

2. The inventions listed as Groups I, II, and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: International search report revealed a prior art document (Struyk et al. (J. Neurosci. Res. (March, 1995), Vol. 15 (3), pages 2141-2156)) which cites close homology to SEQ ID #1 of claim 1 and therefore claims 1-2 are clearly anticipated by Struyk et al. claims 1-2. Naturally, the claims 3-10 lack the same or corresponding special technical features as claims 1-2.
3. A telephone call was made to Drew Hissong on April 18, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit:

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CAR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CAR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CAR 1.48(b) and by the fee required under 37 CAR 1.17(I).
